

Project laboratory:

S. No	Name of the Facilities	Utilization
1	Auto CAD	UG students, and Faculty members utilize the Lab for their mini projects, major projects and research activities
2	STAAD PRO	UG students, and Faculty members utilize the Lab for their mini projects, major projects and research activities
3	E TABS	UG students, and Faculty members utilize the Lab for their mini projects, major projects and research activities
4	Concrete Technology Lab	UG students, and Faculty members utilize the Lab for their mini projects, major projects and research activities
5	Geo-Technical Engineering Lab	UG students, and Faculty members utilize the Lab for their mini projects, major projects and research activities

Project laboratory Facilities & Utilization:

Project Facilities: For projects the following major facilities are available to the students:

- 24 x 7 Wi-Fi connections in the campus
- Subscriptions to e-Journals.
- State of the art equipment's are available in the departments.
- High Speed latest computers with latest software.
- Opportunity for the students to display their project to Public.

Project/Research Laboratories:

- Environmental Engineering Laboratory
- Material Testing Laboratory
- Computer-Aided Design Laboratory
- Concrete and Highway laboratory
- Geotechnical laboratory

Experimental Setup:

- Universal Testing Machine (UTM)
- Consolidation apparatus
- Triaxial apparatus
- CBR test apparatus

- Flexural testing machine
- PH & jar test set up
- Compression Testing Machine

Implementation of innovative project:

- Students are encouraged to implement their own creative and innovative ideas with the well-established Project/Research lab
- Project/ Research lab provides the platform for the students to complete their academic requirements like mini projects and major projects.
- Project lab is exclusively utilized for the research and project work with the instruments and software facilities available.
