

## Balaji Institute of Technology & Science

**Accredited by NBA & NAAC**  
(UG - CE, ME, ECE & CSE)

Affiliated to JNTUH, Hyderabad &  
Approved by the AICTE, New Delhi.

### Core values

We, at Balaji Institute of Technology and Science, consider the following core values close to our heart. We value:

- Being committed to our vision and mission.
- Adhering to the highest standards of ethical values and moral principles and thus achieving excellence.
- Working in collaborative groups and making every staff and student have a sense of belonging.
- Building relationships with our stakeholders through honesty and trust.
- Strengthening institution-industry partnerships and making engineering education meaningful.
- Promoting research by providing support to teacher researchers and research groups.
- Disseminating knowledge in a creative and effective way using the tools of modern technology and making teaching learning process enjoyable.
- Celebrating diversity on the campus by recognizing the uniqueness of individuals.
- Contributing to each individual's personal growth by enabling them to develop the twenty-first-century skills required at the workplace.
- Instilling values in students and moulding them to become service-minded leaders.
- Promoting holistic growth to produce socially responsible citizens.
- Evaluating continuously and improve programs, services, systems and policies to ensure quality and excellence.

**PROGRAM EDUCATIONAL OBJECTIVES**

The graduates will be able to

PEO1	To provide knowledge in core areas of Computer Science and Engineering which include theoretical foundations, practical aspects in the form of lab experiments and project works.
PEO2	To engage in life-long learning in the context of ever changing technologies.
PEO3	To acquire technical skills and soft skills which enable students suitable for employment.

**PROGRAM OUTCOMES AND PROGRAM SPECIFIC OUTCOMES**

A graduate of the Computer Science and Engineering Program will demonstrate

PO 1	<b>Engineering Knowledge</b> : Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
PO 2	<b>PO-2: Problem analysis</b> : Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
PO 3	<b>PO-3: Design/development of solutions</b> : Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
